

60- and 90-DAY PERPETUAL HOSPICE BENEFIT PERIOD DATE CALCULATOR LEAP YEAR SUPPLEMENT

Leap year will have an affect on certain dates on the Hospice Benefit Period Date Calculator. On the year before a leap year occurs, December 2 becomes significant for 90-day benefit periods because 90 days from December 2 is February 29.

For 60-day benefit periods, use the original Benefit Period Date Calculator until December 31. On January 1, use the Leap Year Calculator as 60 days from January 1 is February 29.

USE THE CALCULATOR BELOW FROM DECEMBER 2 THROUGH FEBRUARY 29.

Information About Leap Years

Visit <https://kalender-365.de/leap-years.php>

One year has an actual length of 365 days, 5 hours, 48 minutes and 45 seconds. Therefore, for ease, a "normal year" is 365 days long and a leap year is 366 days long. In leap years, February 29th is added as leap day, which doesn't exist in a normal year. A leap year occurs every 4 years, but not every 100 years, then again every 400 years.

Leap Years 1800 - 2400
